1.1. Problem Summary & Introduction ● There is already available feature for manage catalog, shopping cart and order checkout process ● Existing system have default ecommerce functionality. Nop-Commerce is have its own admin module where admin can manage customer, catalog, manufacturer, vendor, orders, configuration of store, email template, blog, news etc. ● In Nop-Commerce user can view catalog, search product, add product to cart/wish list/compare list and place order. 1.2. Aim and Objectives of Work ● Deals will display at anywhere in store as per selected widget zone. Manage Deals ● Enable/Disable Functionality. ● Configure special discount for specific time period and give configured discount to user. ● Drop table when un-install plug-in functionality. ● Manage Products collection ● Manage tabs into collection with Products. ● Display Product collection on home page with selected layout. ● Manage display product in which order 1.3. Problem Specifications ● In existing system, Deal and special discount display for user is not available. ● There is no available option display product collection wise. Time duration not managed in offers and sells. ● In Nop-Commerce, right now store owner not able to set special price and discount for specific time duration. 1.4. Brief Literature Review & PSAR Patents search activity research (PSAR) formed base for research idea about Mobile Fish Selling Setup project. Further, scope of project was enhanced by design driven canvas exercises. With the purpose of improving the efficiency of fish selling business, many research ideas were proposed and many scholarly articles have been published. Foundation idea and scope of research, for our project, is laid done through PSAR activity. We analyzed various literatures available like patents and other scholarly articles and their analyses with pros and cons, developed our project objective and aims. We also study the some of the international product for fish selling business in japan. With recent advent of advanced technological era and all round development occurring in various domains, various solutions are possible for improving fish selling business of India which were not possible with prior technologies available, few years back. Patent: 1 Patent No: Y02A40/86 Patent Title: System, device and method for sharing fishing information Inventor/s Details: Yohei Terashi About Invention: A fishing information sharing system 10 is provided with terminal equipment 100 for outputting fishing information for registration having fishing spot data and fishing catch data associated with the fishing spot data, and for outputting the input instruction of edited fishing information and a fishing information sharing device 20 for inputting the input instruction of fishing information for registration and/or the edited fishing information. Patent: 2 Patent No: JP 2003-296601 JP Patent Title: Direct selling system of fish Inventor/s Details: Toshiyuki Kikuchi About Invention: Dealer is not a company but an individual in the present invention, in order to eliminate customers anxiety about reliability of the dealer, quality of the commodities, and the like, the angler posts photos of the fish and also information on a photographed date and time and a photographed position from first terminal devices to the server. Thus, customers can have fish caught by individual anglers delivered directly with high reliability without anxiety. Patent: 3 Patent No: JP2007087351A Patent Title: Virtual fish market system using network technology and freshness keeping technology combondely Inventor/s Details: Taku Kawanami About Invention: This virtual fish marker system is constructed by networking based on information technology in order to quicken distribution. Two technologies are combined in this system. One technology applies a neural network technique to balance a dish and a consumption and eliminates overfishing and unnecessary abandonment by catching an actually required amount. The other considerably extends a freshness duration of fish by utilizing sherbet-like ice and is capable of preventing sticking of bacteria by the reduction in handling frequency of fish to provide safe and secured foods to consumers. Patent: 4 Patent No: G06F17/30 Patent Title: Rental or buying, and managing method of aquarium using internet Inventor/s Details: Cho Seung ho About Invention: The present invention Aquarium rent / relates to the purchase and management methods, and more particularly spawning season for various species of fish to customers who sign up as members using the Internet, feeding to sheep and times, proper water temperature, salinity and the Internet fish how to foster respect, etc., and other aquarium rental / purchase and management of rental by providing the information you need to visit if the aquarium is not in the home after receiving a rent deposit and monthly rental charge rent or sell as necessary aquarium manager directly or manage your aquarium purchase and rental of the time period, used by enabling you to transfer ownership after paying the purchase price of large existing as well as Solves the burden could install an aquarium in every home aquarium members want effectively by providing real-time information relating to the management of the aquarium At the same time it is managing to relate to this reason aquarium rental / purchase and manage via the Internet that can further improve the quality of indoor air. Patent: 5 Patent No: JPH0826017A Patent Title: Traveling sales method of fish by automobile and automobile thereof Inventor/s Details: Koyo Kawasaki About Invention: Conventionally, mobile sales of fish by car, and store it in a refrigerated inventory for the space that has been set up fish of one animal of the state to the cargo bed of the vehicle for mobile sales, go to the mobile sales site on the road, where It has been carried out in the exhibition to show the case that the fish has been cooling have been installed on the cargo bed of the same car. The object of the invention is to be Solved by the way, be sold as fillets and sashimi by working in the field of mobile sales on the streets of the fish is prohibited on the law. To judge the raw fish in the outdoors, such as streets and
